

## **A SERIOUS WARNING**

**Jesus said that when he returns, the world will be as it was in the days of Lot. People went about their daily business, eating and drinking, buying and selling, farming and building until the morning Lot left Sodom. Then fire and burning sulphur rained down from heaven and destroyed them all. Check out Luke chapter 17 in the Bible to read His words.**

**Los Alamos, NM was the site of a nuclear bomb test in 1945. The heat of the atomic blast melted the desert sand and turned it into a green glassy substance called Trinitite.**

**Archaeologists are quite certain they have found the site where Sodom was destroyed as Jesus described. They found a lot of trinitite, indicating an enormous destructive event having come from above. Skeptics about the Sodom story in the Bible may wish to repent of their unbelief, and any other sins, and choose to accept Jesus as Lord, forever.**
